EXPERIENCE

Software Engineer

September 2022 - Present

Policy Expert - London, UK

- Writing comprehensive unit and integration tests to ensure robustness and reliability of the platform's frontend components.
- Utilising the latest JS, TypeScript, React, GraphQL and NodeJS to architect scalable, maintainable product features and UI infrastructure to enhance product quality.
- Supporting junior developers through mentorship, promoting a culture of continuous learning and improvement within the team.
- Initiated and led enhancements in codebase quality and testing practices, including the introduction of Playwright for end-to-end and synthetic monitoring testing, significantly improving test coverage and application reliability.
- Led a high-impact project to migrate historical data from legacy systems, saving the company \$50k monthly by developing a module for accessing AWS S3 buckets, which enhanced service efficiency for CREs.

Front End Developer

October 2016 - September 2022

SQLI UK (Previously Redbox Digital) - London, UK

- Contributed to multiple projects that are using Magento, React and Vue, with an emphasis on frontend features;
- Developed components and modules for those features to solve business problems.
- Worked closely in teams with designers, BE developers and project managers to define and implement creative solutions for problems and new features that would have a business impact.
- Worked in many projects with a variety of large to medium size clients in multiple industries such as Nespresso, AXA, , Barbour, Fortnum & Mason, ASQ and many others.
- Integrated and Extended Third-party modules to projects as per requirements using services such as Node-red and Elastic-Search.
- Applied performance profiling to refactor codebase bottlenecks, improving system efficiency
- Implemented a feature to solve the internationalisation problem for translating custom themes in multi store Magento project.
