EXPERIENCE

Front End Developer

October 2016 - Present

Redbox Digital - London, UK

- Contributed to multiple projects that are using Magento and Vue, with an emphasis on frontend features;
- Developed components and modules for those features to solve business problems.
- Worked closely in teams with designers, BE developers and project managers to define and implement creative solutions for problems and new features that would have a business impact.
- Worked in many projects with a variety of large to medium size clients in multiple industries such as **Nespresso, AXA, Fortnum & Mason, ASQ** and many others.
- Integrated and Extended Third-party modules to projects as per requirements using services such as Node-red and Elastic-Search.
- Performed performance profiling to analyse and identify the bottleneck in the codebase to refactor and improve performance.
- Participated in closing multiple projects from change requests to provide supports during warranty period.
- Developed templates for client's ERP systems and maintained them as per requirements.
- Implemented a feature to solve the internationalisation problem for translating custom themes in multi store Magento project.
- Assisted in development of backend features in both admin and frontend site.
